

CONRUST

RUST CONVERTER

DESCRIPTION:

Conrust is a unique chemical liquid coating, which when applied on rusty metal surfaces, reacts with the rust and converts the same into a phosphate coating. This conversion of the rust protects the metal from rusting. Once the reaction is complete, the surface is then ready for further priming and coating.

ADVANTAGES:

- ✓ Easy to use
- ✓ Provides protection to the surface
- ✓ No need to spend a lot of money and effort in removing the rust, as application of rust converter is on the rusted surface.
- ✓ Scratch Resistant

SPECIFICATIONS:

Colour	Colourless Liquid
System	Single Component
Finish	Smooth & Semi-Glossy
Recommended Coats	1-2
Coverage	180-200 sq.ft./litre/coat
Flash Point	Above 40° C.

AREAS OF APPLICATION:

Conrust is primarily applied on rusted metal surfaces.

METHOD OF APPLICATION:

The surface should be free from loose dust, dirt particles, grease oil and earlier treatments if any. The method adapted could be chipping, sand blasting, wire brushing or sand papering which will depend on the condition of the metal to be treated. On the prepared surface **CONRUST** should be liberally applied by brush or spray allowing it to dry for 3 to 4 hours. The surface turns black gradually which means the chemical reaction is taking place. Now the surface is ready for further treatment.

PACKING:

Available in 4 & 20 Litres

WARRANTY CLAUSE: *The product incorporated and sold is without Warranty expressed or implied, including warranty of Merchantability and fitness for use of this material and upon condition that purchaser shall make the own test to determine the suitability and quality of such products for their particular purpose. The user assumes all risks of use and handling, whether or not in accordance with any statement of the supplier. Supplier's liability if any, for any action arising out of the material being supplied shall be limited to only replacement of material.*
